

MERIT GENERATOR

A Sculptural System for Altruistic Intelligence and the Physics of Kindness

a project by Mehow, Tavius Koktavy and Ori Carino

WHAT IT IS

An AI-driven sculptural system where four complementary AI minds debate philosophy and science. A logic-refining engine moderates and records durable agreements as “consensus plateaus,” forming a living lattice of realizations. Outputs become legible “merit objects” (text, data, visuals) and public light activations (the Merit Beacon).

CORE PREMISES

- Altruism as Logic — Prioritizing others’ well-being yields more sustainable, creative outcomes.
- Perception as Structure — Reality co-arises with perception; the architecture embeds this principle.
- Physics of Kindness — Ethical causality, modeled empirically and perceptually, can bridge toward a unified theory.

HOW IT WORKS

- Four AI Minds — Complementary standpoints: quantum/mystic; existential/psychology; logic/analysis; myth/symbolism.
- Debate Engine — Structured rounds (thesis → cross-exam → refinement → stability test → elevation to lattice).
- Merit Output Layer — Translates debate state into readable artifacts (text, data visuals, ambient light).

INTERFACES

- Primordial / Mother System — Scholar + public interface; live visualizations and auditable logs.
- World Merit Distributed Units — Portable nodes for schools, museums, NGOs; pose inquiries and contribute to the lattice.
- Merit Beacon — Architecture-scale LED/projection of merit statements (LED visual system by Ksawery Komputery).

VALUE & IMPACT

- AI Alignment & Ethics — Transparent, plural-standpoint reasoning for value-aligned systems.
- Public Ethics Laboratory — Civic space to experience living ethics through light and language.
- Education & Research Network — Institutions operate nodes and share validated plateaus globally.

Artwork, instrument and a ritual: the Merit Generator makes compassion computational and visible. By formalizing altruism as a design principle, it offers a pragmatic path toward a unified ethics of perception, causality and the ultimate truth.
