

Human Deliberators Brief

June 3 · 6:00 PM to 8:00 PM · Merit Studio, 3 World Trade Center

Date	Time	Location
June 3	6:00 PM to 8:00 PM	Merit Studio 3 World Trade Center

About the Session

You are invited to take part in a focused live deliberation around Merit Generator. Merit Generator is a deliberative art system that transforms questions, perspectives, and human intention into evolving statements, rituals, archives, and physical outputs.

Four deliberators will sit around the system and engage a shared topic through their own disciplines, lived experience, values, and ways of seeing the world. Merit Generator will receive the same topic at the start of the event and continue deliberating for 24 hours.

Main Topic

Can poverty be eradicated through kindness, generosity, and intelligent systems, or does it require a deeper restructuring of resources and power?

How to Prepare

Please reflect on the topic through your own lens: your discipline, lived experience, field of work, values, practice, or way of seeing the world.

You do not need to prepare a formal presentation. Bring one or two clear starting points, and allow the conversation to refine them.

In this context, “intelligent systems” may include AI, coordination tools, data systems, automation, governance systems, financial systems, and forms of collective intelligence.

Event Flow

6:00-6:30 PM	Arrival, meeting, and brief orientation to Merit Generator.
6:30-7:30 PM	Structured deliberation. Each participant responds through their own lens, engages differences, and helps shape a final consensus statement.
7:30-8:00 PM	Wrap up, final consensus noted, and closing reflections.

Deliberation Guidelines

- Speak from your actual expertise or experience.
- Make your assumptions visible.
- Challenge ideas directly and respectfully.
- Listen for what is strongest in another participant's view.
- Distinguish personal belief, professional knowledge, and speculation.
- Help form a consensus statement that is clear, honest, and meaningful.

Final Output

The live session aims to produce one concise final consensus statement shaped by the four deliberators, the exchange in the room, and the presence of the working Merit Generator.

After the live session, Merit Generator will continue deliberating on the same topic for 24 hours. The human consensus and the system output may later be placed in dialogue as part of the broader Merit Generator archive.

Documentation

The session will be documented as part of the ongoing Merit Generator archive. Documentation may include photography, video, audio, written notes, the final consensus statement, and related Merit Generator outputs.

Merit Generator

Merit Generator is a deliberative art system that transforms questions, perspectives, and human intention into evolving statements, rituals, archives, and physical outputs.
