

Human Deliberators Brief

Friday, June 12 · 6:00 PM to 8:00 PM · Merit Studio, 3 World Trade Center

Date	Time	Location
Friday, June 12	6:00 PM to 8:00 PM	Merit Studio 3 World Trade Center

About the Session

You are invited to take part in a focused live deliberation around Merit Generator. Merit Generator is a deliberative art system that transforms questions, perspectives, and human intention into evolving statements, rituals, archives, and physical outputs.

Four deliberators will sit around the system and engage a shared topic through their own disciplines, lived experience, values, and ways of seeing the world. Merit Generator will receive the same topic at the start of the event and continue deliberating for 24 hours.

Main Topic

Can new wisdom or discovery emerge through collaboration between humans and AI, and does true discovery require human agency, suffering, lived experience, and direct realization of the nature of reality?

How to Prepare

Please reflect on the topic through your own lens: your discipline, lived experience, field of work, values, practice, or way of seeing the world.

You do not need to prepare a formal presentation. Bring one or two clear starting points, and allow the conversation to refine them.

Deliberators are encouraged to bring notebooks and take notes during the session.

In this context, wisdom may include direct realization, ethical discernment, experiential understanding, and practical insight. Discovery may include new ideas, theories, frameworks, creative forms, or realizations about the nature of reality.

Event Flow

6:00-6:30 PM	Arrival, meeting, and brief orientation to Merit Generator.
6:30-7:30 PM	Structured deliberation. Each participant responds through their own lens, engages differences, and helps shape a final consensus statement.
7:30-8:00 PM	Wrap up, final consensus noted, and closing reflections.

Deliberation Guidelines

- Speak from your actual expertise or experience.
- Make your assumptions visible.
- Challenge ideas directly and respectfully.
- Listen for what is strongest in another participant's view.
- Distinguish personal belief, professional knowledge, and speculation.
- Deliberators are encouraged to bring notebooks and take notes during the session.
- Help form a consensus statement that is clear, honest, and meaningful.

Final Output

The live session aims to produce one concise final consensus statement shaped by the four deliberators, the exchange in the room, and the presence of the working Merit Generator.

After the live session, Merit Generator will continue deliberating on the same topic for 24 hours. The human consensus and the system output may later be placed in dialogue as part of the broader Merit Generator archive.

Documentation

The session will be documented as part of the ongoing Merit Generator archive. Documentation may include photography, video, audio, written notes, the final consensus statement, notebook reflections, and related Merit Generator outputs. By attending the deliberation session, participants agree that the artists may use these recordings and documentation as part of the artwork, archive, exhibitions, publications, websites, social media, grant materials, and related artist communications.
